As Frontend Developer I have been gaining experience in frontend development since 2021. I build high-performance, responsive, and user-friendly interfaces using React and Next.js. I efficiently manage state with Redux and create modern designs with Tailwind CSS and ShadCN UI. I prioritize code quality, optimization, and user experience to develop seamless web applications.

EXPERIENCE

Frontend Developer | Freelance

October 2023 – Present

- Developing responsive and high-performance web applications
- Creating modern and user-friendly interfaces with React, Next.js, Redux, and Tailwind CSS
- Optimized application performance for a better user experience.
